

**KING'S LYNN CONSERVANCY BOARD.**

Notice to Mariners No. 11/2020.

East Coast of England –

The River Great Ouse, South of King's Lynn

**Islington Pumping Station, Construction Works**

Mariners are advised that the construction of a new drainage pumping station with an associated outfall will be undertaken during 2020 on the West Bank of the River Great Ouse at Islington, between the Smeeth Lode and Mill Basin outfalls, approximately 1000m north of the St Germans Bridge.

There will also be additional works to the existing outfall structures nearby, some of which will continue until the summer of 2021.

These works will involve operations on the riverbank and for a short distance out into the river with large plant and machinery. **All river users, including swimmers and paddlers are to keep well clear of the construction site at all times as some of the works may be covered at high tide and unusual currents or eddies may be experienced.**

Warning signs will be displayed to the north & south of the works, and any temporary obstructions in the river will be marked by marker buoys.

Works on the construction of the new pumping station outfall will commence on 31<sup>st</sup> March 2020 and continue until 31<sup>st</sup> December 2020.

Works on the Eau Brink Outfall will commence on 1<sup>st</sup> June 2020 and continue until 30<sup>th</sup> August 2020

For further information please contact Balfour Beatty Project Manager on 07967 578420.
