

King's Lynn Conservancy Board Operational Statement - COVID-19.

As a modern and risk considerate Competent Harbour Authority, KLCB has implemented steps to mitigate risks in the current climate. All consideration has been given to all relevant guidelines in our mitigation methods.

Business continuity is paramount, and our objective is to achieve this whilst ensuring the safety of our team and their families, our clients and the wider communities in which we live and work.

We're maintaining full operational capabilities and our team is working independently whenever possible

We remain contactable through email and phone and can host virtual meetings/file sharing as needed.

Back in 2018 we invested significantly in a robust IT system to underpin our culture of innovative and flexible working practices.

It's been great to see how effective these tools are when stress-tested as we navigate through these challenging times.

We look forward to continued working with our clients and partners and you can contact us at klcb.hm@btconnect.com and +44(0)1553 773411.

Be Safe,

Captain Patrick Jary,

Harbour Master, Chief Executive & Marine Pilot.
